

YACHTING NZ'S COMPLEX CHART OF ACCOUNTS ARE A BREEZE WITH MONEYWORKS.

With complex reporting mandates, numerous business units and a range of financial periods to manage, Yachting New Zealand's chief financial officer Dianne Logan needs a financial software system that can manage it all.

That's why Yachting New Zealand use MoneyWorks.

With powerful and in-depth reporting capabilities, MoneyWorks has the ability to provide insight into key business metrics leading to better business decisions.

"Yachting New Zealand's brief is driving participation within the sport from a junior level through to high performance sailing i.e. sending our athletes to the Olympic Games. We have a number of business units, each with different P&Ls and financial objectives but MoneyWorks handles all of this seamlessly. Our chart of accounts is pretty complex."

MoneyWorks was developed in New Zealand nearly 20 years ago and is now used in over 100 countries worldwide.

Dashboard charts show you at a glance how a business is performing, while on screen lists give you quick access to your data. It's also compatible across both MAC and PC platforms, but the jewel in the crown is the fact it has the most powerful reporting of any accounting system in its class. It helps you manage your business, not just account for transactions.

"We have a lot of different reporting we have to do. For example, High Performance Sport New Zealand is the governing body that

deals with high performance across all sports and Yachting New Zealand has to report back to them. They put in a new reporting regime and everything had to go back to them using their template. Initially I thought we would have to export everything back into excel in order to drop into their template. But we worked out that MoneyWorks could do it all. I just go in, tweak a few parameters and MoneyWorks produces the report for me. Board reports that used to take days are now done in hours. I'm still finding out little things that it can do even after all this time. It's an amazingly powerful tool."

"Board reports that used to take days are now done in hours."

"All sports are slightly different, but most NSO's are run like projects – you have to keep close tabs on the finances and be able to report on all facets of the business and that's where I think MoneyWorks stands out from the rest."

Terry Nicholas of Nicholas Associates, Yachting New Zealand's accountant agrees. "We reviewed other accounting software solutions and nothing came close to MoneyWorks for its flexibility and business reporting. Other software have reports and templates that only get you so far, even when you use the add ons they don't come anywhere near what MoneyWorks has to offer."

MoneyWorks is the most flexible, powerful and insightful accounting software for serious businesses. For a free 45 day trial visit moneyworks.net.nz
